Weighted Average Discount to Replacement Cost ⁽³⁾ of 13.5%

(1) Purchase price excludes below market leases and mortgage premium intangible assets.

(2) Estimated stabilized cap rates are calculated, at the time of acquisition, as annualized cash basis net operating income stabilized to market occupancy (generally 95%) divided by the total acquisition cost.

(3) Estimated discount to replacement cost is calculated, at the time of acquisition, by dividing the difference between the total acquisition cost and the estimated cost to build the building at current construction and land costs ("replacement cost"), by the total estimated replacement cost.
